

For Goodness Sake Interactive CD

- Behaviour Intervention for Young Children
- resource for early childhood educators and caregivers
- combine training and 7 week program to address challenging behaviour
- enhance interactions with children, parents and team-mates
- respond to need for support in dealing with children who display challenging and aggressive behaviour
- track progress
- include parents' guide

Affiliated Services for Children and Youth (ASCY) wants to provide resource tools and training for those who look after the most challenging and aggressive children – those in day care. This program brings parents, caregivers, nurses and teachers together to support children's development.

Electra brings courseware and interface design to this CD-based resource. We design support materials for participants and the program launch. For Goodness Sake is part of ongoing research.
